

**A Hyper-Deflationary Token with Reflection Rewards**

### **About LeoXL LLC**

The primary goal is to make building wealth effortless for investors. Simply hold LeoXL and earn passive income without being a professional trader in the defi and Centralized crypto space. We are developing an entire environment around a reflections token, adding utility to LXL that is simple and straightforward. We intend to revolutionize the crypto, offering features unique to LeoXL. Earn passive income with our reflections system, giving our investors a leg up in the trading markets. *Translation: Free tokens to trade in the decentralized, centralized, and NFT markets or hold and watch your investments grow.*

### **Intro to the LeoXL Token**

The LeoXL token is a hyper-deflationary token that offers rewards to its holders in reflections. Nothing is more critical to LeoXL LLC than our investors and their buying power in the market. Our coin has been engineered with several features for performance and stability in the market. Let's break it down!

Let's talk about our rewards system or better known as reflections! On every transaction, 5% is distributed to all holders of LeoXL (LXL). This is an excellent feature with purely the investor in mind. Simply hold LXL and watch your LXL increase with every purchase and sale of LXL. You will absolutely enjoy watching our investment grow with every transaction!

A hyper-deflationary token has an automatic buyback and burn feature embedded into the source code of the token. What this feature does is burn off a percentage of tokens on buy and sell transactions. 4% of all transactions will be sent into the burn wallet. Reducing the overall supply of a token creates scarcity in the market, which drives the price of the token up!

Now, let's explain the marketing and development feature of our token. 6% is sent to the Marketing and Development wallet on every transaction. This allows LeoXL to fund all the projects that make the token a success. This feature pays for the development of the

decentralized exchange (DEX), multi-coin wallet, NFT market, centralized exchange (CEX), blockchain, and more.

## The Tokenomics and Reward System

- 500 Billion max supply
- 6% to Marketing and Development
- 4% Buyback and burn
- 5% Reflections to holders

#### **Long term Goals**

**Our long-term goals are to create an ecosystem that unifies the crypto space. Whether you are new to crypto or an all-time great, we intend to simplify crypto. The absolute most crucial thing to LeoXL is you, the investor! We will do everything we can to be a top performer in the market and give our investors real buying power! We plan to do this by wrapping a great token with a fantastic ecosystem. The utility may be the key determining factor in the demand for a token. What better than a reflections token attached to CEX, DEX, and NFT market? Who would like free money to trade with? Our blockchain development ensures that you, the investor, have the best of all worlds. Gas prices are always a concern for investors, and the LeoXL blockchain ensures that investors can trade and create at the highest speeds and the lowest costs. We are a company for the people! Join LeoXL!**

**Thank you from the LeoXL Team!!**
